KTM engineers Ready To Race machines for experienced riders for use in closed courses and designated riding areas - as depicted.

Ready To Race...is more than extreme performance machines, it's an attitude, a way of life. It's how we approach our sport ... deliberate, prepared, safely, responsibly and smart.

Racing and riding can be dangerous. Before you ride a KTM: take an approved training course. Read and understand your owners manual and instructions. Wear all protective gear: helmet, goggles, gloves, boots and body wear. Always: Ride only on surfaces your machine is built for. Respect others, all laws, the environment, restricted surroundings and noise limitations. Ride the correct machine for your skill level and age. Ask your KTM dealer for assistance with these requirements.

Product and program specifications may change without notice. Images of vehicles may be equipped with options not standard.

83 NECK BRACE ADV II MEDIUM

The Neck Brace ADV II offers scientifically and technologically advanced protection against:

- » Hyperflexion (extreme forward movement of the head and overstretching of the head in a forwards direction)
- » Hyperextension (extreme backward movement of the head and overstretching of the head to the rear)
- » Lateral hyperflexion (extreme movement of the head to the side)
- » Axial loading (compression of the spinal column due to a corresponding impact to the helmet)
- » Posterior hypertranslation (rearwards shunting of the head on the neck)
- » Uncontrolled movement of the head/helmet in the event of a crash
- » Energy-absorbing material on the outer surface and body contact surface
- » In extreme cases, controlled breakage of the neck brace absorbs energy
- » Variable size adjustment
- » Simple handling with quick-release fasteners
- » Made from fiberglass reinforced plastic, approx. 850g
- » Made exclusively for KTM by Leatt®
- » Also available in kids sizes, see Racekid Offroad Equipment

100 NECK BRACE ADV II SMALL

- » Neck protection system, made of GRP (fiberglass reinforced plastic), weight approx. 850g (±50g).
- » Partially coated with soft, impact-absorbing foam padding.
- » Designed according to the latest scientific and technological know-how, the Neck Brace ADV II offers protection against: hyperflexion (extreme forward flexion of the head), hyperextension (extreme backward movement), lateral hyperflexion (extreme side movement), axial impact (compression of the spine as a result of an impact to the helmet) and posterior hypertranslation (forcing the head backward on the cervical spinal column).
- » The underlying principle of the neckbrace is to safely arrest the uncontrolled movement of the head/helmet in the event of a crash. This is achieved with the following features: impact-absorbing material on the outer surface and on the surfaces in contact with the body; flexibility due to the construction of the individual components; the neck brace is so constructed that under extreme conditions, it will absorb an impact and break at a predetermined breaking point.
- » Made exclusively for KTM by Leatt.
